

COST SUMMARY & QUOTATION

Village60 *Retirement Operations Platform*

Design, implementation, and hosting of a complete management system for retirement home operations — covering residents, clinical care, inventory & procurement, billing & finance, analytics, and staff administration.

PREPARED BY

TRGAKI

DATE

June 2026

ENGAGEMENT TOTAL

LKR 1,100,000

Includes **twelve months of support & bug fixes** and **three months of additional feature development** at no further cost — delivered, hosted, and maintained as a complete service.

All-inclusive

01 — THE APPLICATION

One platform for the whole operation

Village60 replaces spreadsheets, paper records, and disconnected tools with a single, secure web platform — *purpose-built for retirement home operations*.

Every part of the daily routine lives in one place: resident records and clinical care, medication administration, inventory and purchasing, monthly billing and payment ledgers, occupancy and financial analytics, and a public enquiry funnel for prospective residents. Administrators see the whole organisation; care staff see exactly the homes they are assigned to — nothing more.

The platform is fully responsive for desktop, tablet, and mobile, and speaks the languages of its users — **English, Sinhala, and Tamil** — with each staff member choosing their own preferred language.

35+ APPLICATION SCREENS	69 API ENDPOINTS	33 DATABASE TABLES	88 AUTOMATED TEST SUITES	3 LANGUAGES
--------------------------------------	----------------------------	------------------------------	---------------------------------------	-----------------------

BUILT-IN ACROSS THE PLATFORM

- ✓ **Role-based security.** Admin and Care roles with home-level access scoping on every operation.
- ✓ **Hardened authentication.** Encrypted sessions, strong password policy, and automatic logout on repeated failed sign-ins.
- ✓ **Scheduled automation.** Monthly resident charges generated automatically on the first of every month.
- ✓ **Daily backups.** Automated database backups with retention, plus a documented restore procedure.
- ✓ **Audit trails.** Sign-in events, medication administration records, inventory and billing ledgers — all attributed and tamper-resistant.
- ✓ **Multi-currency billing.** Per-home currency with precise minor-unit accounting throughout.
- ✓ **QR resident profiles.** Shareable, privacy-safe public profile pages with downloadable QR codes for families.
- ✓ **Consistent, accessible UI.** A custom design system with search, filtering, and pagination on every directory.

02 — SCOPE OF DELIVERY

Implemented features & services

i. Platform Foundation

Secure sign-in with encrypted sessions and logout protection, two-tier role system, trilingual interface (English / Sinhala / Tamil), responsive application shell, and production operations — backups, deployment, and runbook.

Authentication

Roles & permissions

3 languages

Backups

ii. Homes, Wards & Residents

Multi-home directory with wards, bed capacity, and per-ward monthly rates. Full resident lifecycle: intake with duplicate detection, portraits, next of kin, power of attorney, nurse assignment, departures, and QR-coded public profiles.

Multi-site

Bed capacity

Resident records

QR profiles

iii. Clinical Care & Medication

Per-resident medication schedules and as-needed (PRN) medication, conditions and allergy registers, and a daily Medication Administration Record (MAR) that logs who gave what and when — automatically deducting stock as doses are given.

Daily MAR

PRN support

Allergies & conditions

Auto stock deduction

iv. Inventory & Procurement

Per-home item catalogs, live stock balances with a full movement ledger, supplier directory, and a complete purchase order lifecycle — draft, approval, sending, receiving, and closure — with smart low-stock medication reorder suggestions.

Stock ledger

Purchase orders

Suppliers

Reorder alerts

v. Billing & Finance

Automated monthly resident charges, invoicing for resident and home operating accounts, payment recording across multiple methods, oldest-first settlement, and unified ledgers — registration fees, deposits, medication, and procurement costs all flow through automatically.

Auto monthly billing

Invoices

Payments

Unified ledger

vi. Analytics & Growth

Occupancy and census trends, monthly cash flow and expense breakdowns, admissions and stay-duration

03 — COST SUMMARY

Investment

ITEMAMOUNT

Implementation & DeliveryLKR 1,045,000

Design, development, and delivery of the complete Village60 platform — all seven feature areas described in the Scope of Delivery, including data model, security, trilingual interface, automated test coverage, and production readiness.

Hosting & Infrastructure — 12 MonthsLKR 55,000

Production hosting, HTTPS, deployment, monitoring, and daily automated backups with documented restore procedures for the first year of operation.

Support & Bug Fixes — 12 MonthsINCLUDED

Ongoing maintenance and resolution of any defects discovered in delivered functionality for a full year from handover.

Additional Feature Development — 3 MonthsINCLUDED

New features and enhancements requested within the first three months after handover, delivered at no additional cost.

TOTAL ENGAGEMENT

LKR 1,100,000

One million one hundred thousand Sri Lankan rupees — all-inclusive.

COMPLIMENTARY · 12 MONTHS

Support & Bug Fixes

Any issue in delivered functionality is investigated and resolved at no charge for one full year.

COMPLIMENTARY · 3 MONTHS

Additional Features

New capabilities and refinements requested in the first quarter after handover are built free of charge.

NOTES

- All amounts are stated in Sri Lankan Rupees (LKR).
- Support covers defects in delivered functionality; the complimentary feature window covers reasonable enhancements agreed
